

# 2019 COMPANY PROFILE

# WHO WE ARE?

TECHNITY was established on 7th February 2018. Our IT Solutions and Services deliver innovative solutions that enhance the way you do business today, allowing you to embrace the technologies that stimulate your company's future growth. From client engagement to technology implementation to service delivery.

We offer smart home solutions, by providing advanced technology which allows you to do things with a simple touch from your work to your home. If smart phones are one of the major tech developments this era, a next big leap in technology is the development of smart homes.

Our IT Solutions and Services give you access to our proficiency in advanced technologies and proven practices along the entire IT life cycle.

#### **Our Vision**

To be most chosen and consistent IT solution providers in the Maldives.

#### **Our Mission**

To be committed in providing our customers with reliable, advanced IT solutions at affordable prices with exceptional quality.

#### **Our Values**

Set the benchmark in the industry by providing an exceptional service to each and every customer.

# OUR BUSINESS ACTIVITIES AND PROFESSIONAL SERVICES

For newly incorporated businesses in Maldives with limited resources and budget, it's not easy to perform all the operations including IT in-house. Performing all services in-house can tie up your limited resources which you might otherwise need to execute core business areas, thus compromising on your business performance, productivity and success. Besides, it can also add to your cost of doing business. Without a well-trained and dedicated IT staff, handling on-site and remote desktop problems can be difficult, frustrating and time-consuming, resulting in productivity loss. For these reasons, IT outsourcing makes sense.

By hiring a professional IT company, you can ensure that all unexpected and sudden IT glitches and troubleshoot will be dealt with and resolved on-demand and efficiently without long delays. By outsourcing IT services, you can also free up your limited IT resources and focus more on your core and revenue generating areas, thereby boosting your operational productivity and business profitability by leaps and bound.

Simply put, IT outsourcing is a great way to reduce cost of doing business, lower IT operational risk, manage IT related problems efficiently, ensure your IT operations run smoothly and improve IT service delivery.

At TECHNITY, we offer businesses a wide range of IT sourcing services including both remote and onsite IT services. From onsite maintenance services to technical support to remote Helpdesk services, full IT management and monitoring to custom designed network solutions, we provide you with the best IT support services you need to run your business smoothly and efficiently with zero downtime, while saving big on cost.
